

# RÉIMERKAPP in Haller

## W4 Walking Trail in Haller – Rocks

Your tour starts at the edge of the small village of Haller. The trail runs for 6.2 km, but there is a short-cut halfway along. The route takes you to the *Brentschenterlee* and *Réimerkapp* rocks. From there, you continue on through the forest, following the *Halerbaach* stream to the *Ellerlee* and *Jammerbréck* rocks. The route back runs past meadows and fields to your starting point. In Haller, there is an attractive small playground behind the school for you to try out.

6,2 km

Solution: Müllerthal

# Rallye: "Waldi Waldbillig Trail"

Waldi Waldbillig, the great adventurer, is looking for someone to succeed him. Would you like to walk in his footsteps? Super – Waldi is delighted about that. But first you need to prove that you are fit to be an explorer. Waldi has devised some challenges for you.

## 1. Cemetery

Here we are at our first stop. Look out for the colored windows. Count the right-angles. How many can you see in the area marked on the photo?

L: 5    M: 26    N: 31

## 2. "Brentschenterlee"

So now you have walked a fair way. We are now by the rock known as the Brentschenterlee. How many "e"s can you count in this name?

R: 5    Q: 6    S: 10

## 3. "Réimerkapp"

Take a deep breath, because now you are about to climb a whole load of steps. The steps take you up to a rock. The rock looks like...

- D: A Roman Head
- E: A Roman Helmet
- F: Roman Sandals

Hint: You will find a clue on the wooden sign. Perhaps an adult can help you, since the name is written there in French.

## 4. Bridge over the Stream

You have just crossed the bridge over the stream. The bridge keeps your feet dry and means you don't have to wade through the stream. Can you help me to find out the name of the stream? It starts with the name in Luxembourgish of the village where you started the walk, and ends with the Luxembourgish word for stream.

\_\_\_ baach

Solution: HALERbaach

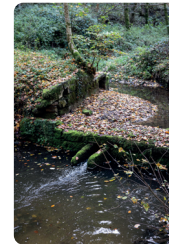

## 5. Rocks with Wear Marks

Here's a challenge for the detective in you. To your left, right by the water's edge, there is a rock with a wide, lengthwise groove in it. Have you found it? Perfect. The groove was probably made when sharpening tools. It is known as a

Solution: Wear Mark

## 6. Milling tradition

Along the route, there are many hidden signs of the past. They are testimony to the time when mills used water power to produce e.g. oil or flour. If you keep your eyes peeled, you can spot them.

Here are two photos: pair the photo with the matching word.

Weir: A weir is a structure built in the water. It is used to control the water level and flow.

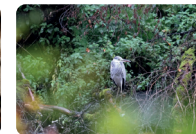

## 7. "Ellerlee"

To your right as the path forks, there is a rock known as the Ellerlee. How tall is/are the following objects?

A: 15m    B: 50m    C: 100m

## 8. Village

Now you are out of the dark forest and heading back to your starting point. Waldi has one last challenge for you. Mark the photos with the animals you see on your way.

And now you can check whether you are ready to walk in Waldi's footsteps. Insert the missing letters. They are found in front of the correct answers to Questions 1, 2, 3 & 7.

\_ ËLLE\_ \_ LL

Congratulations, you are the new Waldi Waldbillig!
